CRJ3750 PORTABLE JAW PRIMARY PLANT

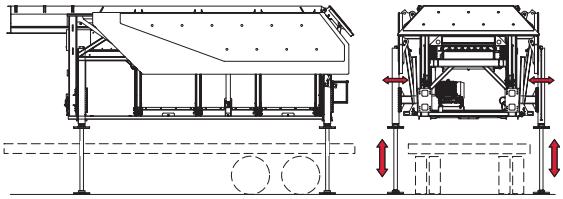

Features and Benefits

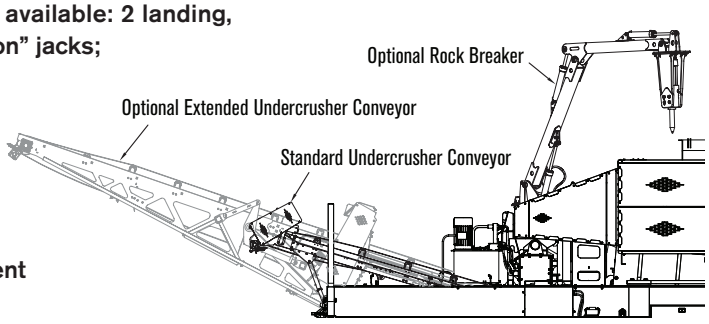

- Highly mobile plant with large 37" x 50" (940 x 1270 mm) feed opening; 250 hp (186 kW) JS3750 jaw crusher and 52" x 20' (1321 x 6096 mm) high-stroke vibrating grizzly feeder with 3/4" (19 mm) AR hopper to handle severe crushing applications
- Optional hydraulic feeder module lift system allows quick and safe removal of the hopper module without a crane; lift legs raise and lower the module for loading to a flatbed trailer for easy transport
- Numerous maintenance and safety features include jaw die lift provisions, tool-free ratchet motor drive adjustment, conveniently located remote grease banks, folding safety rails
- Straight-line undercrusher conveyor design reduces slippage; mechanical raise/lower system lowers tail section for maximum undercrusher clearance, raises tail section for ease of clean-up, unit locks into raised position for travel
- Hydraulic raise/lower switchgear panel system isolates panel from vibration during operation; easily raises and lowers to ground
- Optional extended undercrusher conveyor allows 15' (4572 mm) height to bottom of head pulley (hydraulic legs extended); folds for transport
- Optional 15'7" (4750 mm) wide truck dump hopper and hinged 30" (762 mm) hopper extensions increase hopper capacity; extension locking supports are safely accessible from ground level; hydraulic operation optional
- Various hydraulic jack options available: 2 landing, 6 leveling, or 6 pinned "run-on" jacks; enclosed hydraulic unit
- Quad or 3+1 axle options provide portability in most any location
- Optional rock breaker with electrical controls and pendent

Undercrusher conveyor lowers for maximum clearance

Optional hydraulic feeder module lift system for easy transport
